INDEXES

Subject Index to Volume 6

A

Acetylcholine
  receptor channel function, muscle, 281
  release, presynaptic modulation of, 119
Acidosis, lactic, during exercise, oxygen consumption and, 29
Acupuncture, cardiovascular abnormalities and, 69
Adenosine, receptors, physiological effects, 161
Aldosterone, cells sensitive to, kidney, 201
Apnea, hypoxic, fetal (Notes), 197
Arterioles, glomerular, afferent and efferent, 123
Autonomic function, pain control and, CNS integration of, 82
Autonomic nervous system, control of conduit coronary artery, 103

B

Biomedical research, integrity, 238
Bohr effect, 287
Bombesin, satiety and, 177

C

Caffeine, actions (News), 98
Calcium
  cytosolic free, electromagnetic fields and (Notes), 97
  intracellular waves (News), 242
  signals, nerve cells, 6
  transmembrane fluxes, endothelium, 110
Calcium channel, L-type, regulation of, 277
Carbonic anhydrase, skeletal muscle contraction and, 78
Carotid baroreceptors, two functional types (News), 200
Central nervous system, pain control, autonomic function and, 82
Chloride channel
  activation by epinephrine, heart (Notes), 98
  regulation, wild-type CF gene product (News), 47
Circadian rhythm, resetting, 129
Circulation
  bronchial, 21
  coronary, limitations of metabolic control, 265
Coronary artery, conduit, control by autonomic nervous system, 103
Cytoskeleton, regulation of epithelial sodium channels (News), 199
Czechoslovak Physiological Societies, 143, 244

E

Editorials, 101
Electrophysiology
  epithelial cell fusion, 181
  perforated patch recordings in, 273
Electrosensory system, nonvisual senses (fish), 73
Endothelial mechanisms, neural mechanism interaction, vascular tone, 60
Enteric immune system, intestine and, minibrain communication, 64
Epinephrine, chloride channel activation, heart (Notes), 98
Epithelial cells, fusion, osmotic shock and, 181
Erythroid cells
  differentiation (News), 150
  signaling mechanisms, 247
Erythropoiesis, signaling mechanism in, 247
Exercise
  baroreceptor sensitivity after (Notes), 198
  hyperemia, neurotransmitter role in, 191
  lactic acidosis during, oxygen consumption and, 29
Eye, photochemical damage, 232

F

Federation of European Physiological Societies, 146
Feeding, satiety, bombesin and, 177
Fetus, hypoxic apnea (Notes), 197
Furosemide, horse racing and (Notes), 97

G

Gap junction, cardiac channel, 34
Glomerular filtrate, formation, afferent and efferent arterioles in, 123
G proteins
  cell responsiveness and, 169
  effectors, ion channels as, 158
Gut: see Intestine

H

Heart
  athlete's, hypertrophy (Notes), 199
  epinephrine effects, chloride channels (Notes), 98
  excitability, load effects (Notes), 148
  gap junction channel, 34
  pacemaker potentials, neural control of, 185
  renin-angiotensin system, 227
  rhythm, α-adrenergic modulation of, 134
Heartbeat, chaotic or homeostatic, 87
Homeostasis, heartbeat, 87
Hyperemia, exercise, neurotransmitter role in, 191
Hypertension, genetic and environmental factors, 174
Hypoxia, sleep disturbance in (Notes), 148

I

IGF-I: see Insulin-like growth factor I
Inspiratory pump, neural control of, 260
Insulin, action, bed rest and (Notes), 198
Insulin-like growth factor I, renal phosphate transport and, during growth, 206
International Union of Physiological Sciences, 244, 101, 102
Intestine
  enteric immune system and, minibrain communication, 64
  growth rate, food supply and (Notes), 97
  lumen, unstirred layer (Notes), 197
  nutrient absorption, 92
Ion channels, G protein effectors, 158
Ionic channel, single chemically gated, 107

K

Kidney, aldosterone-sensitive cells in, 201

L

Lung, bronchial circulation, 21
Lymphatics, pleural, regulators of pleural fluid dynamics, 153

M

Mechanosensory system, nonvisual senses (fish), 73
Medulla oblongata, caudal ventrolateral, inhibitory vasomotor neurons in, 139
Melatonin, circadian production and secretion, 223
Membrane effectors, cell responsiveness and, 169
Mesangial cells, renal, nitric oxide effects (News), 243
Metabolic control, coronary circulation limitations of, 265
Monoclonal antibodies, technology (News), 151
Mountain sickness, study (Notes), 96
Muscle
  acetylcholine receptor channel function, motoneuron regulation of, 281
  thermogenesis in, 256
Muscle, skeletal
  contraction, carbonic anhydrase and, 78
  fibers, myogenic regulation of, 1
  venous vessels in, 11
Musculoskeletal system, ultrasonic imaging, 16
Myogenic regulation, skeletal muscle fibers, 1
Myogenic response, arterial vessels and arterioles, 41

N

Natriuretic hormone, development of a hypothesis, 114
Nerve cells, calcium signals in, 6
Nerve physiology, Lorente de No, 235
Neural control
  cardiac pacemaker potentials, 185
  inspiratory pump, 260
Neural mechanisms, endothelial mechanism interaction, vascular tone, 60
Neurodegenerative disease, prions and mouse model for (News), 48
Neurons
  inhibitory vasomotor, caudal ventrolateral medulla oblongata, 139
  network, retina, vertebrate, 214
Neurotransmission, cholinergic and noradrenergic, presynaptic modulation of, 119
Neurotransmitters, exercise hyperemia and, 191
Nitric oxide, renal mesangial cells and (News), 243
Norepinephrine, release, presynaptic modulation of, 119
Nutrients, absorption, intestinal, 92

O

Ontogenesis, early, modification of, stress response of adults, 219
Oxygen
  consumption, lactic acidosis during exercise and, 29
  pressure, temperature interaction and (Notes), 292

P

Pacemaker, potentials, cardiac, neural control and, 185
Pain, mechanisms, 268
Paracrine, modulation, baroreceptor activity, vascular endothelium, 210
Patch recordings, perforated, 273
PDGF: see Platelet-derived growth factor
Peptidergic innervation, anterior pituitary, 26
pH, paradox (Notes), 198
Phosphate, transport, renal, IGF-I role in, 206
Pineal hormone, circadian production and secretion, 223
Pituitary gland, anterior, peptidergic innervation, 26
Platelet-derived growth factor, variant ligands and receptors in, 56
Platelets, aggregation, multiple signal-transduction pathways and, 51

Pleural fluid, dynamics, regulators of, 153
Potassium, receptors, splanchnic, kaliuretic reflexes and, 166
Prions, model for neurodegenerative disease and (News), 48
Protein kinase C, cell responsiveness and, 169

R

Receptors
  adenosine, physiological effects, 161
  α_2-adrenoceptors, vascular, cutaneous thermosensors, 251
  baroreceptors
    activity, vascular endothelium, paracrine effects, 210
    carotid (News), 200
  PDGF, structure-function relations, 56
  potassium, splanchnic, kaliuretic reflexes and, 166
  protein kinase C, cell responsiveness and, 169
Reference style, 288
Reflexes
  kaliuretic, splanchnic potassium receptors and, 166
  viscerocoronary (Notes), 292
Renin-angiotensin system, cardiac, 227
Retina, network mechanisms in, vertebrate, 214
Rhythm
  cardiac, α-adrenergic modulation of, 134
  circadian, resetting, 129
Rostral ventrolateral medulla, cardiovascular neuronal function, 69

S

Satiety, bombesin and, 177
Signal-transduction pathways, multiple, platelet aggregation and, 51
Sleep, disturbance, hypoxia (Notes), 148
Sodium channels, epithelial, regulation by cytoskeleton (News), 199
Stress response, early ontogenesis in, adults, 219

T

Thermogenesis, muscle, 256
Thermosensors, cutaneous, vascular α_2-adrenoceptors as, 251

U

Ultrasound, imaging of musculoskeletal system, 16

V

Vascular tone, neural and endothelial mechanism interaction in control of, 60
Venous vessels, skeletal muscle, 11
Vitamin D_3, 1,25-dihydroxy-, production, IGF-I role in, 206

W

Weight, body, eating restraint and reproductive advantage (Notes), 198

Clinical Physiology of Sleep

Edited by
RALPH LYDIC and JULIEN F. BIEBUYCK,
both of the Pennsylvania State University College of Medicine

This is the first book to systematically discuss the role of the autonomic and respiratory systems in the sleep process while blending phenomenological description with cellular mechanisms and clinical correlations. *Clinical Physiology of Sleep* is divided into six sections: conceptual and comparative background; cardiovascular physiology of sleep; respiration during sleep; thermoregulation during sleep; integrative models of homeostatic control; and epilogue. This volume is sure to find an important place in the library of sleep researchers, respiratory and cardiovascular physiologists, neuroscientists, anesthesiologists, and clinicians concerned with sleep disorders.

November 1988 253 pages, 89 illustrations
ISBN 0-19-520780-7 LC 88-7464 $49.00

**Special APS Member Discount:

Oxford University Press**

Contents

Foreword. *Robert William McCarley*
Preface

Conceptual and Comparative Background
1. Central Regulation of Sleep and Autonomic Physiology. *Ralph Lydic* 2. Evolution and Comparative Physiology of Sleep in Animals. *Irene Tobler*

Cardiovascular Physiology and Sleep
3. Behavioral State and Cardiac Arrhythmias. *Richard L. Verrier* 4. Sleep and Other Behavioral States Reflected in Cardiovascular Response Patterns. *Orville A. Smith* 5. Cardiac and Respiratory Interactions Maintaining Homeostasis During Sleep. *Ronald M. Harper, Robert C. Frysinger, Jingxi Zhang, Robert B. Trelease, and Robert R. Terreberry*

Respiration During Sleep
6. Neural Basis of Behavioral and State-Dependent Control of Breathing. *John Orem* 7. Sleep-Dependent Changes in Upper Airway Muscle Function. *Ralph Lydic, Laurel Wiegand and David Wiegand* 8. Human Sleep-Disordered Breathing. *Clifford W. Zwillich, Laurel Wiegand, Kevin Gleeson, John L. Stauffer, and David P. White*

Thermoregulation During Sleep
9. Thermal Influences on REM Sleep. *Evelyn Satinoff* 10. Sleep-Dependent Changes in the Thermoregulatory System. *H. Craig Heller, Steven Glotzbach, Dennis Grahn, and Carolyn Radeke* 11. Thermoregulation During Sleep From the Viewpoint of Homeostasis. *Pier Luigi Parmeggiani* 12. Regulation of Energy Metabolism and Body Temperature During Sleep and Circadian Torpor. *Ralph J. Berger and Nathan H. Phillips*

Integrative Models of Homeostatic Control During Sleep
13. Sleep Homeostasis in Humans and Rats. *Alexander A. Borbely, Peter Achermann, Lorenz Trachsel, and Irene Tobler* 14. Homeostasis and Heteroplasticity: Functional Significance of Behavioral State Sequences. *J. Allan Hobson*

Epilogue
15. Anesthesia and Sleep: A Search for Mechanisms and Research Approaches. *Julien F. Biebuyck*
